MADAGASCAR

Your donations help support our conservation, education and community development programs

## Conservation

Forest management and protection initiatives, including creating fire breaks to protect fragments of forest from uncontrollable wildfire.

Forest restoration projects, including restoring landscapes to create corridors to reconnect fragmented habitats and planting trees to reduce the impacts of erosion.

## Education

Distributed lambas (a traditional Malagasy clothing item) with lemurs and conservation messages on them to members of the local community.

Local adults are trained to host conservation workshops for children, enabling the community to continue to educate themselves in the future.

## Community

Conducting surveys within the local communities to help improve the livelihood and well-being of the people who live in the conservation focus areas.

Supporting and enabling local women to become involved in conservation and focusing on improving education, health, sanitation and livelihood opportunities for them.
